The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-4 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It remains unclear what is recited through use of "capacity percent". Applicant points to use of the term in another patent. However, applicant fails to provide the meaning of the term. Each application stands on its own merits and the examiner is prohibited from commenting on the validity of U.S. Patents.

Claims 1-4,6-10 and 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sugiura et al '896 in view of Keller.

The rejection is maintained as stated in the paper mailed 8/27/03.

Applicant's arguments are addressed in the statement of the rejection. Applicant fails to address the allegations that both Keller and Sugiura et al discuss the effects of concentrations of gases in the cooling step, thus indicating the concentrations to be a result effective variable and subject to routine optimization by one of ordinary skill in the art.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this

final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
